5. Protest Against Upper Silesia's Partition, Sent to Lord Curzon by the Radicals and Socialists	61

Annex 1 – Analysis of Outvoting Effect on Each

Voting Unit – Data and Statistics

Apart from illustrating the statistical result of the plebiscite for each voting unit, the following data are arranged in a manner revealing the extent of the non-resident ‘outvoter’ effect on the Upper Silesian plebiscite. The effect of the outvoters’ on the plebiscite result and the subsequent partition of Upper Silesia in 1922 have remained a source of historical dispute for decades. A campaign staged by the Polish Silesians in 1920-21 may have successfully deterred up to 120,000 potential German outvoters from registering, nevertheless, historians who are sympathetic to the Polish cause in Upper Silesia still attribute considerable weight to the effect on the plebiscite result of the near 180,000 German outvoters’ who did travel there. After the plebiscite result was known, the Polish Government’s official responses always cited anecdotal evidence suggesting the Germans had manipulated the outvoter numbers. One of the purposes of **Chapter 3** of this thesis has been to examine the outvoters’ effect on the plebiscite’s outcome. To help establish a comprehensive and reliable base from which to establish this, the statistics and data in each one of Upper Silesia’s 1,545 individual voting units (towns, communes and *Gutsbezirke*) have been analysed.

In this exercise, the total of voters registered in each of the three voting categories (native residents; immigrants resident before 1904; and outvoters qualified by birth) have been recalculated using technology unavailable in 1921. These earlier calculations show some errors but the differences are very slight. In her *Plebiscites Since The World War* (Vol.1 pp.249-250), Sara Wambaugh also noted discrepancies between various lists of results and observed that many *Gutsbezirke* appear to have been inadvertently placed with communes of the same name. In fact, as this thesis explains, *Gutsbezirke* with one hundred residents or less had been amalgamated with

adjacent communes. To address this and any other slight discrepancies, the following calculations have been based on data merged from two official lists. These are the official results (PRO FO 371/5895 C7462/92/18 24 April 1921) forwarded to London by the inter-Allied Plebiscite Commission, and another list published in the Commission's own *Gazeta Urzędowa Górnego Śląska* No.21 (reproduced in the Silesian Institute's *Encyklopedia Powstań Śląskich, Aneks 1*). One of the most recurring errors found in these original results were discrepancies in the 'total electorate' and 'number voted' columns. Wherever this was the case, the correct aggregate for the 'number voted' has been established by totalling the German, Polish, and spoiled votes for that voting unit.

Since all three classes of votes were counted together, one cannot be certain how many outvoters actually cast their votes. However, because we know that there was a 97.5% turnout, and we also know the registered totals in all three voting categories, it is not difficult to reach a very close approximation. Simple arithmetic dictates that by subtracting the number of resident and immigrant voters (1,029,654) registered from the total number of plebiscite votes cast (1,190,533) on 20 March 1921, then the difference will equal the minimum number of outvoters who must have voted – an exercise indicating that at least 160,879 (84%) of registered outvoters participated. This of course assumes a 100% turnout by the registered residents and immigrant voters. However, the plebiscite turnout was 97.5%. This means that 25,724 (or 2.5%) of the 1,029,654 registered residents and immigrants failed to vote. Adding these 25,724 registered residents and immigrant voters failing to vote to the 160,879 outvoters we have established must have voted, it is reasonable to conclude that about 186,603 (97.6%) of the registered outvoters probably voted in the plebiscite.

In the following analysis of the voting patterns, each *Kreis* is identified, but only the voting units where outvoters had swung that particular town, commune or *Gutsbezirke* (manorial estates) in Germany's favour, are identified. The numbers in the extreme left-hand column of the table correspond to the numbers allocated to the individual voting units on the original results (detailed above). In the few instances where the numbers do not run sequentially, this is because:

1. On the original lists, the numbers omitted had no data against them

or

2. They were omitted from the results that the Commission sent to London.

In Paris, Lloyd George had promised Paderewski that the plebiscite area would not be treated as one single constituency. The result in each individual voting unit was to be the basis used to establish a line of partition through the plebiscite area. Had this remained the case, then outvoting would not have greatly affected the plebiscite result - see **Tables 7 and 9**. However, because Britain wanted Germany to retain the wealth-creating industrial district to maintain its economic strength, this is not how posterity has come to judge the plebiscite's outcome.

A false perception of the plebiscite's outcome to serve this political objective was encouraged by statements circulated by British and German politicians. Treating the plebiscite area as a single constituency, they presented the plebiscite's result to the world on a numerical basis. Germany was said to have won the vote, with over 60% of Silesians opting for Germany, but only 40% of them voting for Poland – see **Table 8**. This was simple for the public to understand and much more emotive than interpreting the vast patchwork of communes and *Gutzbezirke* won by Poland throughout the coal fields and the industrial district – see **Table 9**. The Poles had also won the numerical vote in this area, which was adjacent to the Polish border – see **Table 10**. In fact, the

industrial district and the coalfields contained 70% of the total Polish plebiscite vote but only 45.5% of the German total.

Britain continued promoting an Upper Silesian settlement on the basis of a single territorial vote while France stuck to the correct interpretation of the Treaty. The problem was finally referred to League of Nations. However, the League based their proposals on the 6-4 ratio between the Germans and the Poles. This meant that while the impact of the German outvoters in terms of winning more voting units was limited, because they had boosted the total German vote by a massive 25.5%, they did greatly influence the plebiscite's outcome. This version of events has been perpetuated in Anglo-Saxon historiography. Today, histories are still being produced which claim that the Germans 'won' the Upper Silesian plebiscite and the Poles somehow robbed them of the territory that the Poles were eventually awarded.

Regarding the following data and statistic, the designation 'No' or 'Yes' in the column on the extreme right hand side, answers the question whether or not the outvoters participation in that particular town, commune or *Gutsbezirke* had made any difference to the community opting for Germany. Where the community voted for Poland, the space has been left blank. Through this analysis, it quickly becomes apparent why the outvoters would have made far less difference to the plebiscite's outcome had Upper Silesia's partition been carried out according to the provisions of the Versailles Treaty. The relatively few 'Yes' entries (106) and the vast majorities appearing at some of the 'No' entries (where outvoting had made no difference to the outcome), indicates that most outvoters simply reinforced the existing majorities - see **Table 7**. In other words, apart from 106 locations where they did make a difference, German outvoters went to towns, communes and *Gutsbezirke* where the inhabitants would have opted for Germany in any case.

The largest influxes of outvoters appeared in areas of Upper Silesia unclaimed by the Silesian Poles. For example, in Namysłów. There, the *Gutsbezirke* of Starościn's 61 resident voters were joined by 435 outvoters. The German campaign leaders must have realised this. Apart from further straining the deteriorating relations within the Entente, the only advantage Germany could have derived from bringing so many outvoters into areas of Upper Silesia which they well knew they would hold, was to enhance their overall total vote and present the plebiscite result as if it was a single constituency. The German campaign and this interpretation were legitimised in the British public's eye by the prominence that Lloyd George also gave to the overall totals each side obtained. This was in what was a well-publicised and important speech to the House of Commons on 13 May 1921. In it, he highlighted the fact that 'for Upper Silesia as a whole, that there has been a majority in favour of the German claim by something like six to four'.¹ This became a convenient statistic for the Versailles Peace Treaty's many British apologists and others who advocated that Upper Silesia be retained by Germany.

1. House of Commons Debates Vol.141 13 May 1921 Col.2381.

ANNEX 1 - Analysis of Outvoting Effect on Each Voting Unit												
Voting units where outvoting was a significant factor (Nos. correspond to original sources)	Registered native voters	Registered out voters	Registered immigrant voters	Total electorate	Number voted	Polish vote	German vote	Spilled votes	% of out voters to total electorate	% of out voters and immigrant voters to total electorate.	German majority	Out voter effect?

Annex 5 - Protest Against Upper Silesia's Partition, Sent To Lord Curzon by the Radicals and Socialists

6 Arthur Road
Edgbaston
Birmingham

Dec. 10th 1921

Your Excellency,

I have been asked to address a brief line to your lordship concerning the enclosed manifesto on the Upper Silesian Decision.

The signatories trust that, in your well known anxiety for peace and progress of the world, you will carefully consider the gross injustice of this decision.

For in the face of a substantial majority, sixty-one per cent for German Citizenship & in disregard of the most powerful historic consideration, it allots at least seventy per cent of the economic advantage to the Polish Minority.

I am your Excellency's most obedient servant,

[Professor] Raymond Beazley

ENCLOSURE

December 1921

Sir,

We, the undersigned, solemnly protest against the arrangement for partitioning Silesia approved by the Council of the League of Nations. We recognise especially in the economic division as now ordered, a departure from justice, a disregard of

history, a defiance of the verdict given by the recent plebiscite. We foresee that such a partition makes it more than ever impossible for Germany, thus still further and so terribly crippled, to meet the Reparation demands upon her. And we believe that such a verdict will intensify afresh the unrest of Europe, the danger of future war, and the disorganisation and impoverishment of society, not only on the Continent, but in this country.

Yours faithfully

(Signed) **Lord Parmoor**

Charles G. Ammon (Member of the Executive of the National Labour Party)

Walter H. Ayles (General Secretary British Independent Labour Party)

W. Banfield (Civic Councillor, General Secretary Operative Baker, Confectioners & Kindrid Workers. Ed. Journeyman Bakers' Magazine)
